

SMS DESK

Light and simple interface to administer your systems.

Get the stored data in the SMS database.

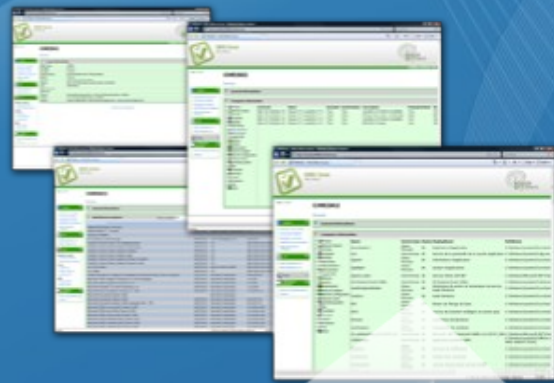

SMS Desk is made for all IT actors :

- ✓ **Administrators** for daily tasks and monitoring,
- ✓ **Managers** for their decisions and for global review

No installation required : Manage your systems from your web navigator

On the client side, no additional software is installed :
Just a PC together with a compatible web browser will meet the requirement !

(Tested with Internet Explorer)

Getting the relevant information becomes simple

Check services state, display component list.

Simple tasks accessible with a single mouse clic.

SMS DESK

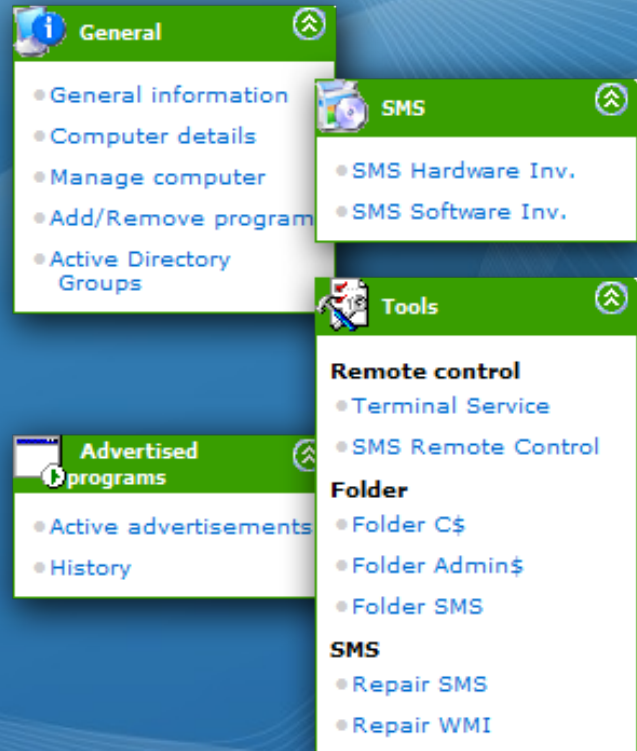

Add additional features easily or build your own modules.

A software solution that always fits your needs.

Features
